AWS Certified Cloud Practitioner

Amazon Skill builder

Amazon Web Services (AWS)

Date Obtained: Nov 2024

PROFILE

AWS fresher with foundational knowledge of cloud computing and core services like EC2, S3, VPC and RDS. Eager to apply my understanding of cloud architecture and deployment strategies in a collaborative environment.

WORK EXPERIENCE

TNQ Technologies 2019 - 2021

Graphics Associate | e-Publishing

- **Image Re-drawing & Editing:** Redesigned and re-drew images, charts, and graphics for publishing, ensuring high-quality visuals for a statistics analysis platform.
- **Statistical Visualizations:** Created and edited graphs, charts, and data representations to effectively communicate complex statistical information to diverse audiences.
- **Deadline Management:** Delivered high-quality visual content within strict deadlines for various publishing projects, balancing multiple tasks efficiently.

Hexaware Technology BPS 2023 - 2024

Executive Business Activation (International)

- **Client Interaction & Relationship Management:** Managed client interactions, acting as the primary point of contact for inquiries related to business activation processes.
- **Issue Resolution:** Effectively resolved client queries and activation-related issues by providing clear, timely, and actionable solutions, ensuring high levels of client satisfaction.
- **Cross-functional Collaboration:** Worked closely with sales, operations, and customer support teams to resolve complex client issues and ensure seamless business activation and onboarding.

AWS PROJECT

1. Cloud Networking: VPC and Peering

- Designed and implemented a robust Virtual Private Cloud (VPC) infrastructure to enhance network security and resource management. Configured VPC peering for secure communication between multiple VPCs, optimizing resource sharing and data transfer.

2. Cloud Storage: Amazon S3

- Developed an AWS S3 bucket project to efficiently store and manage data, implementing policies for access control, lifecycle management, and versioning to ensure data integrity and optimize storage costs

3. Static Website Acceleration with CloudFront

- Leveraged Amazon CloudFront to serve static website content hosted on Amazon S3, enhancing user experience. Configured CloudFront with SSL/TLS to secure data transmission and protect user information.

4. Amazon Lex Integration with S3 for Image Handling

- Developed an Amazon Lex chatbot that integrates with AWS S3 to dynamically retrieve and display images, enhancing user interaction and engagement through visual content in response to user queries
